

What you need to know about **STIMULUS FUNDING** for school building facility upgrades.

Elementary & Secondary School Emergency Relief (ESSER) Fund was established via three pandemic-era stimulus bills passed by the federal government. These funds are accessible primarily via your local educational agencies (LEAs) - states and districts.

Over \$15 billion in stimulus funding is available to schools in Pennsylvania, Maryland, Delaware and New Jersey ...but it wont last forever.

Since the pandemic began, the federal government has made \$15.7 billion in funding available to public and private Pre-K-12 schools, colleges, and universities in Pennsylvania, Maryland, Delaware and New Jersey to ensure a safe and healthy learning environment.

Schools like yours can use this funding to modernize HVAC and building systems, thereby improving indoor air quality (IAQ) and energy efficiency for years to come. An added benefit: The downstream cost savings from these efficiency improvements will free up funding for future projects.

But the funds won't last forever – they'll expire in 2023.*

See what upgrades & investments qualify.

We are ready to help you assess your needs, design a solution, and get the project done now, so you can focus on the most important thing – educating our future generations. Contact us.

What upgrades and investments qualify?

Over 90 percent of ESSER funding is available for a broad category of needs, under the discretion of the local funding agency. General ESSER funding can support immediate pandemic needs, such as masks, testing, sanitizers, and plexiglass barriers. It also provides aid to mental health services and students facing disadvantages such as homelessness and disabilities.

ESSER funding can also be put toward...

- Improving Indoor Air Quality (IAQ) via Filtration, Ventilation, Purification, and other Air Cleaning Systems
- Inspection, Testing, Maintenance, Repair & Replacement of Aging Building Controls and HVAC Systems
- Occupancy Temperature Scanning and/or Counting Technologies, Access Control, and Security Systems
- Outdoor Learning Infrastructure, Sustainable Outdoor Learning Environments (SOLE) for Hands-on STEM
- Energy Performance Contracting and Modernization Services that Increase Financial Flexibility for Upgrades

How do you access ESSER funding?

ESSER funding processes vary by state. The federal government is making ESSER funding available to states, who in turn will deliver funds to individual districts and schools. You should reach out to your state's education department for more information. You can find more details on allocation methodology [here](#) and state-level allocations [here](#).

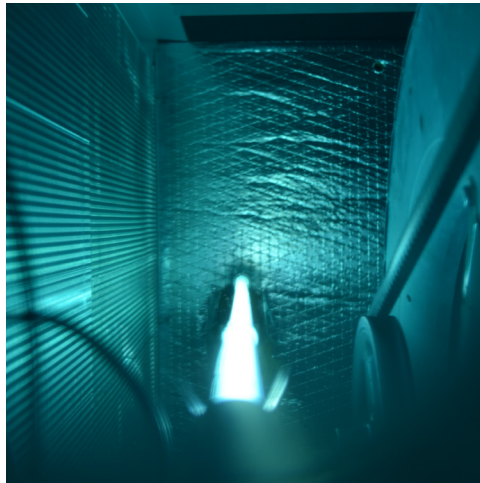

ESSER timeline and funding totals, at a glance

ESSER	ESSER II	American Rescue Plan (ARP) ESSER Supplement
\$	\$	\$
\$19.4B billion total funding for schools	\$77B billion total funding for schools	\$161.5 billion total funding for schools
\$13.5B for K-12	\$54.3B for K-12	\$122B for K-12
\$5.9B for higher education	\$22.7B for higher education	\$39.5B for higher education
Funds available until September 30, 2022	Funds available until September 30, 2023	Funds available until September 30, 2023
Established by the Coronavirus Aid, Relief, and Economic Security (CARES) Act, Section 18003, Division B, passed in March 2020	Established by Coronavirus Response and Relief Supplemental Appropriations (CRRSA) Act, Section 313, passed in January 2021	Established by the ARP, Section 2001, passed in March 2021
